dashborad

Date: 20191204 Author: LiuZhangshu Version: v1.0.0

版本	修改内容	修改人
v1.0.0	init	刘章术

安装

编写kubernetes-dashboard.yaml

```
image:
    repository: k8s.gcr.io/kubernetes-dashboard-amd64
    tag: v1.10.1
ingress:
    enabled: true
hosts:
        - k8s.frognew.com
annotations:
        nginx.ingress.kubernetes.io/ssl-redirect: "true"
        nginx.ingress.kubernetes.io/backend-protocol: "HTTPS"
tls:
        - secretName: frognew-com-tls-secret
hosts:
        - k8s.frognew.com
rbac:
    clusterAdminRole: true
```

通过helm安装

```
helm fetch stable/kubernetes-dashboard

cd kubernetes-dashboard

helm install . \
-n kubernetes-dashboard \
--namespace kube-system \
-f kubernetes-dashboard.yaml
```

访问方式修改

```
kubectl edit svc kubernetes-dashboard -n kube-system
#修改ClusterIP 为NodeIP
```

配置浏览器访问方式

访问方式有两种: 1.通过kubeconfig; 2.通过dashboard的token访问

token查看方式如下:

附录

下载

helm repo update helm fetch stable/kubernetes-dashboard

CA证书位置 (解决Google无法访问未认证的https站点)

1s /etc/kubernetes/pki/ca.crt
